Kupilka Gift Set

£79.95

KUPILKA products are made of a Biomaterial. The Biomaterial used for KUPILKA products is a Thermoplastic Natural Fibre Composite material, it is made up of 50% pine fibre (wood) and 50% plastic. If you compare it to plastic, the benefits of Natural Fibre Composites are a better heat endurance and a higher durability thanks to the stiffer structure. Another advantage when comparing the material to plastic is that it enables the use of engraving techniques. If you compare it to wood, the benefits of Natural Fibre Composites are that it doesn't require maintenance, doesn't "absorb" smells and is insensitive to humidity. All KUPILKA products are dishwasher safe and recyclable.
Wooden boxed gift set contains Kupilka snaps kuksa, classic kuksa cup, classic bowl kuksa, plate, cutlery set
